DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim 2 is, drawn to ball elements or ball section elements in ball sockets of an intermediate piece wherein the intermediate piece is seated by a roller, a ball or a sliding bearing.

Group II, claims 12-13 are, drawn to specific facing tracks on guide rails wherein a carriage is guided by revolving rollers or ball units.

Group III, claim 14 is, drawn to strippers and sealing elements.

Group IV, claims 15-16 are, drawn to specific rail guides being cut into a base frame.

Group V, claims 17-18 are, drawn to specific table and gate.

Group VI, claim 19 is, drawn to a specific passage for an ejector.

Group VII, claim 20 is, drawn to a specific measuring pickup of a measuring system.

The inventions listed as Groups I-VII do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common matter of the independent claim 1 is well known as evidenced by ISR and the remaining subject matter of each claim differs from that of the others without there being any unifying novel inventive concept common to all. Claim 1 will be examined with the elected group and claims 3-11 will be examined if group I is elected.

2. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Choi whose telephone number is 571-272-4504. The examiner can normally be reached on Monday-Thursday 9:00-5:30.
